- LoRa module
- Temperature sensors
- Long-range wireless
- Cold-chain monitoring

The MOD-LORA-01 is a LoRa module for temperature-sensor applications with the MDT880. It is intended for use together with Topicon temperature-sensor solutions such as the U350 sensor.

It enables long-range wireless communication in monitoring and cold-chain scenarios where sensor data must be collected reliably.

Compatible with: Topicon MDT880, Topicon MDT865, Topicon MDT1065
